The Transport & Infrastructure Award

A vital sector, where safety, security and functionality often take precedence over social, cultural and aesthetic considerations, and where ecology and the environment are all too often overlooked.

The judges' comments on previous winners reflect an appreciation of projects that unlock the potential for transport and infrastructure awards to make a lasting, transformative impact on the communities they serve and transform the civic realm.

“In some ways, it’s more exciting to win an award for something that’s been there for over 20 years. It proves that it works—not just that it looked good on the day of handover”

*Glenn Howells,
Howells*

About the awards

We launched our awards as a direct riposte to the prevalent awards culture. Instead of focussing on what's new, what's fresh, what's perfect, what's pristine, we look at what has endured, what's flexible, what's adaptable, what works, what performs. Submitting an entry isn't about salesmanship or showmanship. It's about engaging with this discussion; revisiting projects with the benefit of hindsight and reflecting on lessons learnt.

The aim is not to hold an annual beauty parade, but to establish a canon; an archive of projects that represent best practice and have demonstrated their worth. And to demonstrate the long-term value of projects that stand the test of time. Crucially, these awards exist to make the long-term value of architecture visible: to show that flexibility, longevity, and performance are not secondary virtues, but the most meaningful measure of success.

Isabel Allen
Editor, Architecture Today

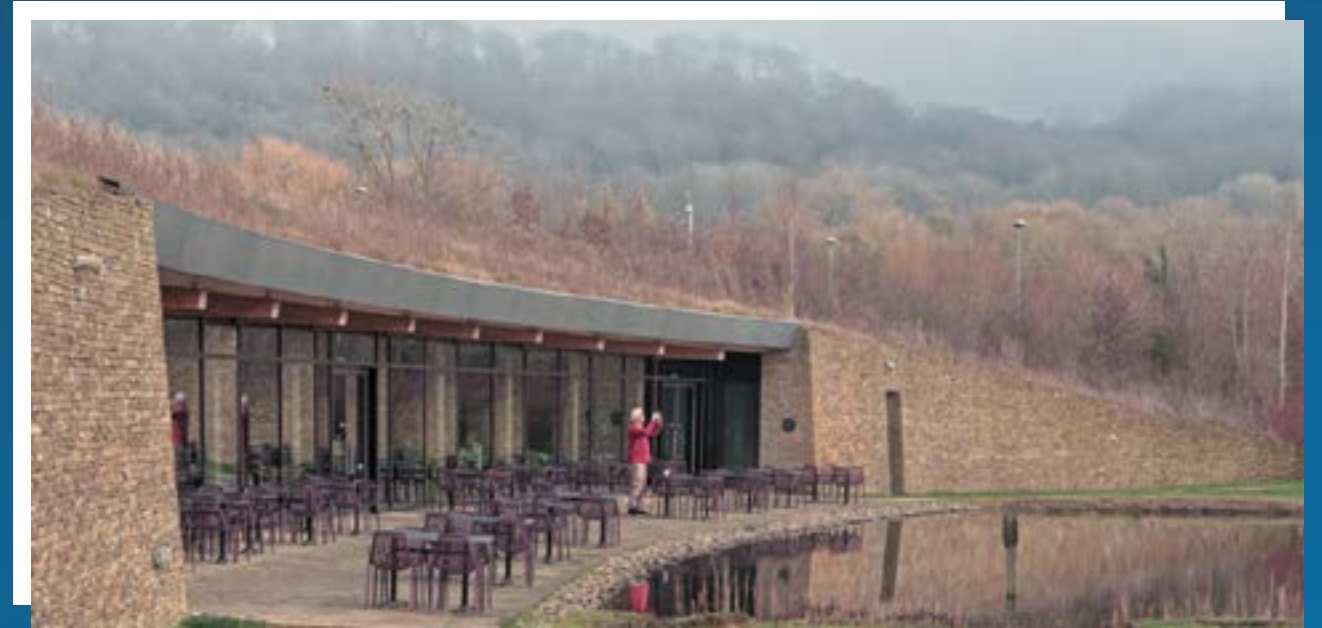

Previous winners

**Stratford Town Centre Link, east London,
by Knight Architects**

“Completed in 2012, this key public route has been in heavy and continuous use ever since. Durable, low-maintenance and with a 120-year design life, it stands as testament to the value of robust materials, minimal design – and a sculptural sensibility that injects joy to the daily commute and the civic realm.”

[Find out more](#)

**Gloucester Services, Gloucester,
by Howells**

“Designed over a decade ago, Gloucester Services set new benchmarks for sustainability and customer experience, and carried off the improbable feat of transforming local residents’ biggest bugbear – the proximity of the M5 – into a beacon of community regeneration and hope. The project shows just how good this woefully neglected building type can be.”

Why enter?

- Demonstrate your ability to produce work that delivers long-term value over time.
- Showcase your expertise in this sector to a wide audience of judges, collaborators and clients
- Reconnect with clients and collaborators and reflect on lessons learned
- High-profile media exposure with all shortlisted projects announced on *Architecture Today's* website and social media channels
- All winning projects covered extensively on *Architecture Today's* website and in a **special awards issue of *Architecture Today***
- All winning projects are rephotographed by leading architectural photographer Timothy Soar
- Teams behind the winning projects record a **presentation** on their scheme, which is widely promoted through AT's media channels and forms part of an archive of best-in-field projects that have stood the test of time

“Revisiting these projects long after completion is always illuminating. Time reveals things no jury visit ever can”

*Timothy Soar,
Photographer*

Process

All entries are thoroughly reviewed by our Awards Panel, who typically select three finalists in each category. The teams behind the shortlisted projects are invited to present their project to our expert jury at the Live Finals, a day of live crits which will take place on 16th July at The Society Building in central London.

We work with the successful entrants to record their presentations for the AT archive of outstanding buildings that have stood the test of time, a free-to-access resource for academia, practice and clients.

The winning project in each category is rephotographed by Timothy Soar and published on AT's website and in a **special awards issue of *Architecture Today***.

“These awards have real integrity”

*Paul Monaghan,
Allford Hall Monaghan Morris*

Founder and Director, Atelier One

Kimberly Tryba

Managing Principal, LILA Studio

Charlotte Walker

Senior Planner, Lichfields

Cindy Walters

Director, Walters & Cohen Architects

Keith Williams

Founder + Director of Design, Keith Williams Architects

Winners' Party

The winners will be announced at an awards party on Thursday 12th November at 76 Southbank, a Grade II listed building designed for IBM by Sir Denys Lasdun and completed in 1983, and recently refurbished and extended by Allford Hall Monaghan Morris for Wolfe Commercial Properties.

“This is a critically important award, particularly in the era we live in, where responsibility is increasingly central to architectural practice. This is not about designing something wonderful and then disappearing; it’s about standing by your decisions and a powerful way of reflecting on those responsibilities, and reminding ourselves what they really mean”

*Peter Bishop,
The Bartlett School of
Architecture, UCL*

Entry criteria

The Test of Time Awards are designed to showcase, celebrate and share knowledge about buildings that have stood the test of time.

Projects will only be considered if they have been in use for at least three years and can demonstrate a strong track record for delivering on their environmental, functional, community and cultural ambitions.

Each category is open to new-build and retrofit projects. Projects can be of any scale or typology and in any part of the world, but must have been completed before April 1st 2023 to be eligible for entry.

You do not have to be a registered architect to submit a project. We actively encourage submissions from consultants, clients, charities, residents and community groups.

Group submissions are particularly welcome. Some of the strongest submissions and presentations have been made by a designer in tandem with a collaborator or client.

“I want to congratulate Architecture Today for doing what many of us have dreamed of happening for a long time. To reward buildings, not out of fashion the day they’ve finished, not because of the way they look, but how they actually work out in practice, and how they stand the test of time”

*Sunand Prasad
Perkins&Will*
